TECHNICAL SKILLS

React.js, Express, Python, SQL, Redux, JavaScript, HTML, CSS,flask,SQLAlchemy , PostgreSQL, Docker, Node, API`s

PROJECTS

Raynes Closet | Express | React | Redux |Javascript | Node | SQL | CSS | HTML | Flask | PostgreSQL
https://raynes-closet.onrender.com | https://github.com/Hproud/Raynes_Closet
This project is an e-commerce based site geared toward selling clothing.

- Created a "Suggestions" feature to allow for potential consumers to provide direct feedback as to their specific needs in order to boost overall revenue.
- Implemented an "Order Update" feature that allows for an administration account to go in and update the status for a consumer's order to keep them in direct communication with the progress of their specific orders.
- Fabricated the ability to grant or remove administrator permissions for any account only accessible from the master account.

Yum Cart | python | React | Redux |Javascript | Node | SQL | CSS | HTML | Flask | Docker | PostgreSQL
https://yum-cart.onrender.com | https://github.com/jadenadams329/aA-group-project
This is a food ordering service where consumers may order from a variety of restaurants and have it delivered for their convenience to their home.

- Developed and Produced a "Cart" Feature allowing consumers to visualize all products that they have selected for purchase as well as displaying the current collective monetary value of all said items..
- introduced the "Checkout" Function for this application that does not allow for invalid payment credentials and allows for consumers to have the option to use credit previously placed on their account.
- Constructed strict validation checks during checkout when entering card information to insure that the card being entered is a valid card with the appropriate amount of numbers, a valid expiration date, and a valid CVV code.

WORK EXPERIENCE

Stocking / Unloading Associate   **May 2024– Present**
Walmart, McCook Nebraska

For this position my main responsibilities are to receive merchandise shipments and place them strategically onto the sales floor so that they are readily available for consumers.

- Exhibiting crucial time management skills by ensuring that all assigned duties are performed between and during freight deliveries to ensure all daily tasks are complete so that products are available for our customers.
- Express superior communication skills in order to work as a team in order to unload shipments in a safe and timely manner.

Merchandising Associate   **September 2023 - May 2024**

DriveLine Merchandising, Southwest Nebraska / Northern Kansas

- Provide visually appealing product displays as well as product quality control checks to ensure that the customers receive products that are fresh and inviting.
- Exhibit superior time management skills with scheduling each project at each location in a manner to reach a deadline placed for the release of products and services.
- Demonstrated exceptional communication and teamwork working on teams of two or more to complete the setting of different displays for products and services.

Customer Service Associate   **Mar 2022– Sep 2023**

Walmart, McCook Nebraska

For this position my main responsibilities were to process customer complaints and return and to provide leadership to cashiers in the event of confusion.

- Provided exceptional Leadership to all employed cashiers, allowing them to feel supported and nurtured and raised our retention rate by 3%.
- Provided extraordinary customer service while handling customer relations with front end staff as well as when the opportunity arose to interact with customers throughout the establishment.

Paramedic   **Jan 2021– Mar 2022**

Phelps Memorial Health Systems, HoldregeNebraska

Provide patient care in emergency situations to insure patient safety and transport in all situations as well as to provide an improved patient outcome.

- Performed life- saving measures in immensely stressful and time sensitive conditions to improve patient outcomes and ensure safe and timely care and transport.
- Provided exceptional communication and emotional support for patients and patient families in emergent situations as well as explaining treatment plans and procedures as they are being performed..
