This project is an e-commerce-based site geared toward selling clothing.

- Developed a cart functionality utilizing Redux for state management, enabling the persistence of essential product data for user transactions.
- Executed multiple queries against a PostgreSQL relational database through the Sequelize ORM for efficient data manipulation and retrieval.
- Implemented a two-tier authentication routing system to facilitate granular administrative access control across multiple levels of user permissions.

Yum Cart | python | React | Redux | Javascript | Node | SQL | CSS | HTML | Flask | Docker | PostgreSQL

This is a food ordering service where consumers may order from a variety of restaurants and have it delivered for their convenience to their homes.

- Implemented real-time interactive shopping cart management for adding, removing, and modifying cart items by dispatching asynchronous actions to edit cart quantities and fetch updated inventory data.
 - Utilized asynchronous actions and state management to fetch and display selected cart items and review associated data, enhancing user interaction.
 - Utilized the bcrypt hashing function to securely save user information with hashed passwords to increase user security.
 - Collaborated with a team of two other peers by utilizing continuous communication in order to construct, test, debug, and host this application.
 - Constructed complex associations and classes within a relational database by utilizing SQLAlchemy as an ORM in order to obtain user specific data based on the authorization of the user.
-

WORK EXPERIENCE

Stocking / Unloading Associate Walmart, McCook Nebraska	May 2024– Present
Merchandising Associate DriveLine Merchandising, Southwest Nebraska / Northern Kansas	September 2023 - May 2024
Customer Service Associate Walmart, McCook Nebraska	Mar 2022– Sep 2023
Paramedic Phelps Memorial Health Systems, Holdrege Nebraska	Jan 2021– Mar 2022

EDUCATION

Certificate of Completion ParaMedicine	Central Texas College – 2019
Software Development Boot Camp Full-Stack Software Development	App Academy – 2024
